Leave with: a problem · a person · questions

Agenda wall
Front of room

ROOM SET UP

1. Tape the Agenda wall at the front with the Design Thinking Journey next to it. Point to Diamond 1 (the problem) during the Alien Invasion debrief, and back to Discover at the end. Put the Bug Hunt rules nearby.
2. Tape each Station sheet onto big paper and spread the 5 stations around the room with space between them. Put a post-it pad and sharpies at each.
3. Keep the crew sheets (5 Whys, HMW, Persona, Interview) face down on a side table. Hand them out only at their step.
4. As kids arrive, pair them up (5 pairs). Mix ages: older with younger.

---

1 · Alien Invasion

0:00 to 0:10 · 10 min

HECHO EN OSA

Step 01 · 10 min

Alien Invasion!

Listen and read together

1	2	3
Your mission	Pick a plan	The challenge
Aliens just landed on the Oval. Your crew has to decide how to survive.	Make Peace: say hi to the aliens and write 3 rules so everyone gets along. Escape Earth: jump on a spaceship and pack 3 things to bring.	You have 4 minutes to plan together. Then your spokesperson has 1 minute to tell everyone why your plan is the best.

Crew name: _____

Circle your plan

MAKE PEACE | ESCAPE EARTH

Our 3 rules or 3 things

1. Why it helps
2. Why it helps
3. Why it helps

Our spokesperson: _____

The person who shares our plan — Everyone must agree

Crew sheet
1 per crew · sharpies

DO

1. Split into 2 crews of 5. Hand each crew a sheet and sharpies.
2. Read the 3 boxes out loud, dramatically. (1 min)
3. Crews pick Make Peace (3 rules) or Escape Earth (3 things to bring), and choose a speaker. (4 min)
4. Each speaker shares why their plan is best, 1 minute each. (2 min)
5. Debrief and connect to today. (2 min)

SAY

"Welcome, builders! Before we build anything, we have to survive an alien invasion."

"Your whole crew has to agree. No majority vote."

Debrief: "What did you have to figure out **before** you could pick your rules or things?"

"Real builders don't start with tools. They start with the problem and the people. Today we find our problem, our person, and our questions."

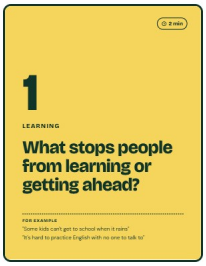

Tip: Crew done early? "The aliens say you can only keep 2. Which one do you give up?"

2 · Bug Hunt stations

0:10 to 0:22 · 12 min

Rules sign

Station 1

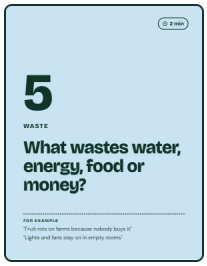

Station 2

Station 3

Station 4

Station 5

Also: post-its and a sharpie for every kid.

THE 5 LENSES

Station prompt	Lens
1 · What stops people from learning or getting ahead?	Learning
2 · What makes people unsafe or unhealthy?	Health & Safety
3 · What makes people feel left out, lonely or unheard?	Belonging
4 · What is hurting the environment, like oceans, rainforests or animals?	Environment
5 · What wastes water, energy, food or money?	Waste

Each station looks at problems through a different lens, so kids think wide. These are not tied to tracks: a solution to any problem can end up in any track.

DO

1. Send each pair to a different station. (1 min)
2. Pairs write bugs for 2 minutes, then rotate clockwise on your signal. 5 rounds, every pair visits every station. (10 min)
3. Walk around. Read prompts aloud for anyone who is stuck.

SAY

"A bug is a problem that makes life harder for people, animals or the planet. Think about other people, not just you."

"One bug per post-it. Write big, 3 to 5 words. Drawing is OK."

At each rotation: "Read what's already there. Does it give you a new idea? Add it!"

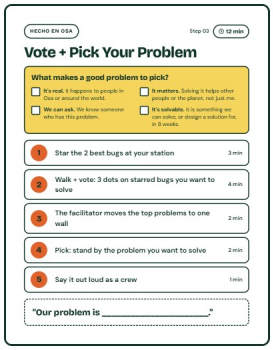

Tip: Before the first rotation, write one bug on a post-it in front of the room and stick it up. Each station has 2 example bugs at the bottom for kids who get stuck. If most post-its copy the

examples, say: "Great, now find one nobody has written yet."

---

3 · Vote + Pick Your Problem

0:22 to 0:34 · 12 min

Vote + Pick sign
Next to the stations

DO

1. **Star (3 min).** Pairs stay at the station where Bug Hunt ended. They read every bug out loud and star the 2 best, using the "What makes a good problem to pick?" checklist: it's real, it matters, we can ask someone, it's solvable in 8 weeks.
2. **Vote (4 min).** Everyone walks to all 5 stations and adds 3 sharpie dots to starred bugs they want to solve. Give a 1-minute warning. While they vote, spot the 4 or 5 bugs with the most dots.
3. **Put up the top problems (2 min).** Take the 4 or 5 bugs with the most dots off their stations and move them to one wall, spaced far apart. Read each one out loud as you tape it up.
4. **Pick (2 min).** Kids stand under the problem on the wall they want to solve. Whoever stands together is a crew of 2 to 3. Solo is OK. Balance crowded problems.
5. **Say it (1 min).** Each crew says: "Our problem is ___."

SAY

"Read every bug out loud to your partner. Star the 2 that matter most."

"Now vote for the bugs **you** would want to solve. You can put all 3 dots on one."

"Stand by the problem **you** want to spend 8 weeks on. Not where your friend goes."

"This isn't final. You'll decide for sure after you talk to real people."

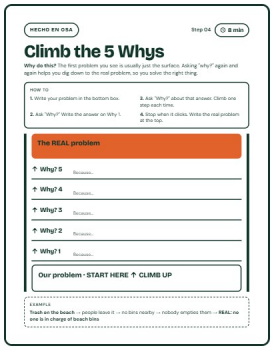

Tips: A tie? Put both on the wall. More than 3 kids at one problem? Ask who is excited about a second choice. Nobody at a problem? Leave it.

Impact check: If a crew drifts toward "a video game" or "a go-kart" or something only for themselves, don't say no. Ask: "Who else has this problem? How would solving it help other people or the planet?" Their passion can become the solution later. Today it has to start from a

real problem.

4 · 5 Whys

0:34 to 0:42 · 8 min

MECHO EN OSA

Step 04 · 8 min

Climb the 5 Whys

Why do this? The first problem you see is usually just the surface. Asking "why?" again and again helps you dig down to the real problem, so you solve the right thing.

HOW TO

1. Write your problem in the bottom box.
2. Ask "Why?" Write the answer on Why 1.
3. Ask "Why?" about that answer. Climb one step each time.
4. Stop when it clicks. Write the real problem at the top.

The REAL problem

↑ Why? 5 Because...

↑ Why? 4 Because...

↑ Why? 3 Because...

↑ Why? 2 Because...

↑ Why? 1 Because...

Our problem · START HERE ↑ CLIMB UP

EXAMPLE

Trash on the beach → people leave it → no bins nearby → nobody empties them → **REAL:** no one is in charge of beach bins

5 Whys ladder
1 per crew

DO

1. Model one live with the trash example. (1 min)
2. Crews write their problem in the bottom box and climb: ask "why?", write the answer one step up. (6 min)
3. Crews circle the answer that feels like the real problem and write it in the top box. (1 min)

SAY

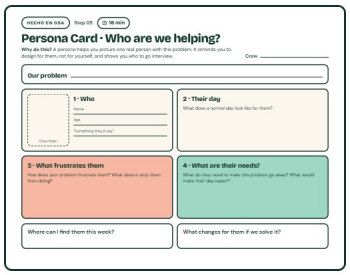

"Start at the bottom. Every time you ask 'why?', you climb one step."

"The real problem usually shows up around why number 3 or 4."

Tip: Pair younger crews with a mentor here. This is the most abstract step.

5 · Persona Card

0:42 to 0:58 · 16 min

MECHO EN OSA

Step 05 · 16 min

Persona Card · Who are we helping?

Why do this? A persona helps you picture one real person with this problem. It reminds you to design for them, not for yourself, and shows you who to go interview.

Crew: _____

Our problem _____

1 · Who

Name

Age

"Something they'd say"

Draw their face

2 · Their day

What does a normal day look like for them?

3 · What frustrates them

How does your problem frustrate them? What does it stop them from doing?

4 · What are their needs?

What do they need to make this problem go away? What would make their day easier?

Where can I find them this week?

What changes for them if we solve it?

Persona Card
1 per crew

DO

1. Crews write their problem at the top, then draw their person and fill in name, age and a quote. (4 min)
2. Fill boxes 2 to 4: their day, what frustrates them, what they need. (8 min)
3. Fill the bottom strip: where to find them this week, and what changes if we solve it. (4 min)

SAY

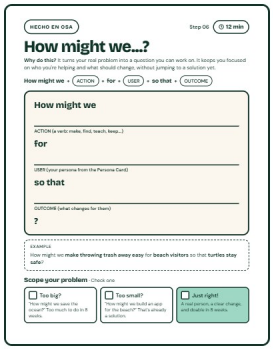

"Who has this problem? Make them feel like a real person: a name, a face and a day."

"If we solve this, what changes for them? That's your impact."

Tip: Field Science crews: the persona is the person who needs the evidence (a ranger, a fisher, a farmer), not the turtle or the river.

6 · How Might We

0:58 to 1:10 · 12 min

HMW template
1 per crew

DO

1. Read the example on the sheet out loud. (1 min)
2. Crews fill in the ACTION, USER and OUTCOME blanks, like a Mad Lib, using their Persona Card and their real problem from the 5 Whys. (8 min)
3. Crews tick Too big, Too small or Just right. Fix it until it's just right. (3 min)

SAY

"Use your Persona Card. Their name goes in USER, their needs help you pick the ACTION, and what changes for them is the OUTCOME."

"How might we **action** for **user** so that **outcome**? Just fill in the blanks."

"Too big sounds like 'save the ocean.' Too small already has the answer in it, like 'build an app.'"

Tip: The USER must be someone they can actually talk to this week.

7 · Interview Prep

1:10 to 1:22 · 12 min

Interview Questions
1 per crew

Persona Interviews
3 per kid

DO

1. Act out a bad interview in 30 seconds: "Don't you think my app is amazing?" Kids will laugh, and get it.
2. Crews fill in the Interview Questions sheet: write their problem at the top, say each starter with their problem in the blank, and write their own version. Show the "too vague" vs "about the problem" example first. (4 min)
3. Hand out 3 Persona Interviews sheets per kid, one for each person they'll talk to. (1 min)
4. Pair practice using their own questions: one interviews, one plays the persona. 2.5 minutes each, then swap. (5 min)

5. Everyone writes the name of a real person at the top of each sheet ("I'm talking to"). (1 min)

SAY

"Put your problem into every question. Not 'tell me about this,' but 'tell me about the last time **the road flooded**.'"

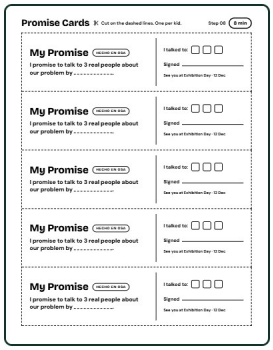

"Your job is to listen, not to sell your idea."

"When they say something interesting, ask 'why?' and write down their exact words."

---

8 · Share + Promise

1:22 to 1:30 · 8 min

Promise Cards
My Promise
I promise to talk to 3 real people about our problem by
I talked to:
Signed
See you at Exhibition Day · 12 Dec

Promise wall
Tape and a phone

DO

1. Crews tape up their HMW and Persona side by side. (1 min)
2. Gallery walk: everyone adds one post-it question to another crew's wall. (3 min)
3. Diamond 2 preview: point to Diamond 2 on the Design Thinking Journey. "After your interviews, you'll brainstorm solutions and pick a track: a game, a story, an app, an experiment or a gadget." (1 min)
4. Write the deadline date on the Promise wall. Every kid signs. (2 min)
5. Photograph every sheet. Thank everyone. (1 min)

SAY

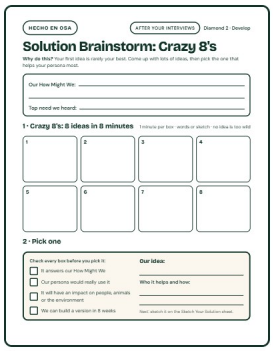

"Before we meet again, talk to 3 real people. Bring back what they said."

"You walked in with ideas. You're walking out with a problem, a person and questions. See you at Exhibition Day, 12 December!"

After the session

- Post the photos in the Hecho en Osa WhatsApp group so every crew has their HMW, persona and questions.
- Send crew sheets home with the crews, or keep them for the first mentor check-in.
- Share each crew's problem and persona with the mentors so matching can start.
- Next session: crews bring their interview notes and map what they learned. Then they come up with 8 ideas and pick one on the Crazy 8's sheet, sketch it on the Sketch Your Solution sheet, and choose their track and impact on the Track Map sheet.

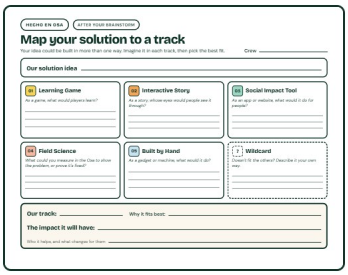

- Once crews have a rough version: each crew tests it with 3 real people their solution is meant to help, using one Usability Test sheet per tester.

↑ Why? 3 Because...

↑ Why? 2 Because...

↑ Why? 1 Because...

Our problem · START HERE ↑ CLIMB UP

EXAMPLE

Trash on the beach → people leave it → no bins nearby → nobody empties them → **REAL: no one is in charge of beach bins**

2 min

1

LEARNING

What stops people from learning or getting ahead?

FOR EXAMPLE

"Some kids can't get to school when it rains"

"It's hard to practice English with no one to talk to"

Solution Brainstorm: Crazy 8's

Why do this? Your first idea is rarely your best. Come up with lots of ideas, then pick the one that helps your persona most.

Our How Might We: _____

_____

Top need we heard: _____

1 · Crazy 8's: 8 ideas in 8 minutes

1 minute per box · words or sketch · no idea is too wild

1	2	3	4
5	6	7	8

2 · Pick one

Check every box before you pick it:

- ☐ It answers our How Might We
- ☐ Our persona would really use it
- ☐ It will have an impact on people, animals or the environment
- ☐ We can build a version in 8 weeks

Our idea:

_____

Who it helps and how:

_____

_____

Next: sketch it on the Sketch Your Solution sheet.

HECHO EN OSA

Step 01 | 10 min

Alien Invasion!

Listen and read together

1

Your mission

Aliens just landed on the Osa! Your crew has to decide how to survive.

2

Pick a plan

Make Peace: say hi to the aliens and write 3 rules so everyone gets along.

Escape Earth: jump on a spaceship and pick 3 things to bring.

3

The challenge

You have **4 minutes** to plan together. Then your spokesperson has **1 minute** to tell everyone why your plan is the best.

Crew name: _____

Circle your plan

MAKE PEACE | **ESCAPE EARTH**

Our 3 rules or 3 things

1. _____
   Why it helps _____
2. _____
   Why it helps _____
3. _____
   Why it helps _____

Our spokesperson: _____

The person who shares our plan

Everyone must agree

HECHO EN OSA Step 05 16 min

Persona Card · Who are we helping?

Why do this? A persona helps you picture one real person with this problem. It reminds you to design for them, not for yourself, and shows you who to go interview.

Crew _____

Our problem _____

Draw them

1 · Who

Name _____

Age _____

"Something they'd say" _____

2 · Their day

What does a normal day look like for them?

3 · What frustrates them

How does your problem frustrate them? What does it stop them from doing?

4 · What are their needs?

What do they need to make this problem go away? What would make their day easier?

Where can I find them this week?

What changes for them if we solve it?

2 min

2

HEALTH + SAFETY

What makes people unsafe or unhealthy?

FOR EXAMPLE

"The river floods fast and people get stuck"

"There's no shade at the bus stop"

Sketch Your Solution

Why do this? A sketch helps everyone see the same idea. Draw it big and label the parts. Stick figures are totally fine.

Our idea: _____ Crew _____

Draw it big. Label the parts with arrows.

How it works, step by step

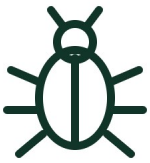

1 · First...	2 · Then...	3 · Finally...

Who uses it: _____

The impact: _____

HECHO EN OSA

Step 02 · 12 min

Bug Hunt

A bug is a problem that makes life harder for **people, animals or the planet**. Think about others, not just you.

GOAL: Find as many bugs (problems) as you can for each question before time runs out!

1. Find your partner. Go to your station.
2. Read the question. Write 1 bug per post-it.
3. Stick it on the big paper around the question.
4. Read what others wrote. Add more!
5. When you hear the signal, rotate.

Pairs · 5 stations · 2 min each **More is better!**

2 min

3

BELONGING

What makes people feel left out, lonely or unheard?

FOR EXAMPLE

"New kids don't know anyone"

"Older people feel like nobody visits them"

HECHO EN OSA

AFTER YOUR BRAINSTORM

Map your solution to a track

Your idea could be built in more than one way. Imagine it in each track, then pick the best fit.

Crew _____

Our solution idea _____

01 Learning Game

As a game, what would players learn?

_____

_____

_____

02 Interactive Story

As a story, whose eyes would people see it through?

_____

_____

_____

03 Social Impact Tool

As an app or website, what would it do for people?

_____

_____

_____

04 Field Science

What could you measure in the Osa to show the problem, or prove it's fixed?

_____

_____

_____

05 Built by Hand

As a gadget or machine, what would it do?

_____

_____

_____

? Wildcard

Doesn't fit the others? Describe it your own way.

_____

_____

_____

Our track: _____ Why it fits best: _____

The impact it will have: _____

Who it helps, and what changes for them _____

HECHO EN OSA

Step 06 · 12 min

How might we...?

Why do this? It turns your real problem into a question you can work on. It keeps you focused on who you're helping and what should change, without jumping to a solution yet.

How might we + ACTION + **for** + USER + **so that** + OUTCOME

How might we

_____

ACTION (a verb: make, find, teach, keep...)

for

_____

USER (your persona from the Persona Card)

so that

_____

OUTCOME (what changes for them)

?

EXAMPLE

How might we **make throwing trash away easy** for **beach visitors** so that **turtles stay safe**?

Scope your problem · Check one

☐ **Too big?**
"How might we save the ocean?" Too much to do in 8 weeks.

☐ **Too small?**
"How might we build an app for the beach?" That's already a solution.

☐ **Just right!**
A real person, a clear change, and doable in 8 weeks.

HECHO EN OSA

Step 03 · 12 min

Vote + Pick Your Problem

What makes a good problem to pick?

- [ ] **It's real.** It happens to people in Osa or around the world.
- [ ] **It matters.** Solving it helps other people or the planet, not just me.
- [ ] **We can ask.** We know someone who has this problem.
- [ ] **It's solvable.** It is something we can solve, or design a solution for, in 8 weeks.

1	Star the 2 best bugs at your station	3 min
2	Walk + vote: 3 dots on starred bugs you want to solve	4 min
3	The facilitator moves the top problems to one wall	2 min
4	Pick: stand by the problem you want to solve	2 min
5	Say it out loud as a crew	1 min

"Our problem is _____."

2 min

4

ENVIRONMENT

What is hurting the environment, like oceans, rainforests or animals?

FOR EXAMPLE

"Beach lights confuse baby sea turtles"

"Trash washes into the river after rain"

HECHO EN OSA

Step 07 · 12 min

Persona Interviews

Why do this? Real people know their problem better than we do. What they tell you shapes what you build.

INTERVIEW #
1 2 3
circle one

I'm talking to: _____ **Like our persona?** Yes · Kind of · No

Our problem: _____

Listen, don't pitch | ? Ask "why?" a lot | Write their words

1 Frustrations

Find out: what goes wrong and how it feels

"What frustrates you most about ___?"

2 Workarounds

Find out: what they do about it today

"What have you tried to fix ___? Did it work?"

3 Needs

Find out: what would really make it better

"What would make ___ easier for you?"

4 Magic wand

Find out: what perfect would look like · ask this last

"If you had a magic wand, how would you fix ___?"

Best quote (their exact words)

"

Biggest surprise

Something you didn't expect to hear

HECHO EN OSA

AFTER YOU BUILD A VERSION

Diamond 2 · Deliver

Usability Test

Why do this? Watch a real person use what you built. Where they get stuck shows you exactly what to fix.

TEST #
1 2 3
circle one

Tester: _____ **Like our persona?** Yes · Kind of · No

What we're testing: _____

Don't help or explain. Just watch.

Ask them to think out loud.

Write what they say and do.

1 · Give them tasks to try

Task: "Can you try to..."	How did it go? (circle)	Where did they get stuck?
1	Easy · Hard · Stuck	
2	Easy · Hard · Stuck	
3	Easy · Hard · Stuck	

2 · Ask them after

What did you like? _____

What was confusing? _____

Would you use it? Why or why not? _____

How much would it help you? Not at all (1) (2) (3) (4) (5) A lot

One thing we'll fix: _____

2 min

5

WASTE

What wastes water, energy, food or money?

FOR EXAMPLE

"Fruit rots on farms because nobody buys it"

"Lights and fans stay on in empty rooms"

Interview Questions

Why do this? Put your problem in each blank, then write your own question.

Start every interview with:

"We're working on _____ . Can I ask you a few questions?"

OUR PROBLEM

TOO VAGUE
"Tell me about the last time this happened."

ABOUT THE PROBLEM
"Tell me about the last time **the river flooded the road** on your way home."

1 Frustrations

"What frustrates you most about _____?"

"Tell me about the last time _____ happened to you."

e.g. What frustrates you most about the road flooding?

Our question:

_____

_____

2 Workarounds

"When _____ happens, what do you do?"

"What have you tried to fix _____? Did it work?"

e.g. When the road floods, how do you get home?

Our question:

_____

_____

3 Needs

"What would make _____ easier for you?"

"What do you wish you had when _____ happens?"

e.g. What do you wish you knew before the road floods?

Our question:

_____

_____

4 Magic wand · ask last

"If you had a magic wand, how would you fix _____?"

e.g. If you had a magic wand, how would you make flooding less scary?

Our question:

_____

_____

Dig deeper: "Why?" "Tell me more." "What happened next?" "Can you show me?"

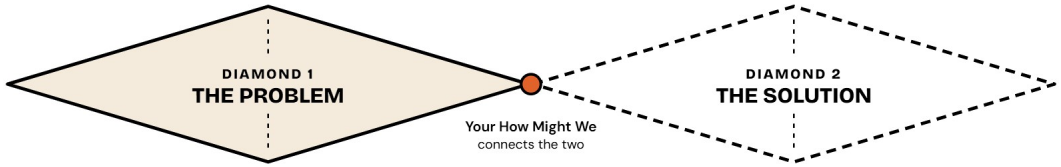

HECHO EN OSA

Kickoff · 8 weeks · Exhibition Day 12 Dec

Our design thinking journey

The Double Diamond: first find the right problem, then find the right solution.

TODAY · THIS WEEK · NEXT 8 WEEKS

1 · Discover

↔ Go wide · explore the problem

Find problems — TODAY

Spot as many bugs as you can.

How: Bug Hunt

Investigate — THIS WEEK

Talk to real people. Listen more than you talk.

How: Persona Interviews

2 · Define

↔ Narrow down · the real problem

Pick a problem — TODAY

Real, matters, and solvable.

How: Vote + Pick

Dive deeper — TODAY

The real problem and who it's for.

How: 5 Whys, Persona Card, How Might We

Map what you learned

Find patterns in your interviews. Sharpen your How Might We.

3 · Develop

↔ Go wide · explore solutions

Create solutions

Brainstorm lots of ideas. No idea is too wild.

How: Crazy 8's, Sketch, Track Map

Try quick versions

Make rough versions fast and show them to your users.

How: Paper prototypes, or vibe-coding a quick app with AI

4 · Deliver

↔ Narrow down · build the best one

Build + test

Build your best idea. Test it with the real people it's meant to help, then make it better.

How: Usability Test sheet + mentor check-ins

Show it

Demo it live and explain how it solves something real.

How: Exhibition Day, 12 Dec

↻ **Today we take a quick first pass through Diamond 1.** Your interviews take you back to Discover, so your Define gets sharper. Going back a step is normal. Good builders do it all the time.
